insight into your assets

What you don't know about your critical plant assets and infrastructure can develop into significant risks. Sensor Networks, Inc. delivers the visual inspection tools you need to see inside and inspect process and pressure components for cleanliness and mechanical damage; helping you assess condition and retrieve loose parts.

innovation

At Sensor Networks, we combine new technologies with novel approaches to monitoring asset integrity, giving you advanced tools to keep your systems operating safely, productively and efficiently.

expertise

Drawing on more than 90 years of combined experience in visual inspection across a range of industrial sectors, our team takes the guesswork out of applications engineering. Trust us to bring the best technologies and techniques to bear on your inspection challenges.

reliability

More than thirty Fortune 500 companies already rely on our technology and team to gain better insight on their critical infrastructure.

PTZx

PTZx includes everything you need to perform tank, vessel or large-area inspections of piping and facility infrastructure. Even with 100' of cable, cable reel, monitor and digital recorder, this system weighs under 30 lbs. (13.6 kg) and can be carried in one hand. The result of decades of RVI experience, PTZx is rugged, reliable, waterproof and easy-to-use.

variable-speed
360-deg continuous rotation

corrosion-resistant nickel-plated
aluminum with stainless steel

submersible to 100'

integral & optional auxiliary LED lamps

36x or 12x optical zoom

high-res camera with sensitivity
control for reflective surfaces

variable-speed 270-deg tilt

integrated system

modular system

digital video recorder & monitor

- 5" TFT color LCD with sun shield
- Date/time stamp
- Uncompressed BMP image capture
- AVI video recording
- Integrated mic with on/off
- SDHC card storage up to 32GB

control unit

- 45m reel (extendable to 90m)
- Adjustable zoom lens
- Auto/manual focus
- Adjustable light intensity
- Adjustable video brightness
- Camera position memory
- Image control

applications:

- **Nuclear Power:** Reactor pressure vessel and cooling pumps, steam generator channel head, nozzle welds, fuel pool, fuel assembly, spent fuel, IWE/IWL exams.
- **Fossil Power:** FAC & MIC inspections, baffle plates, HP steam headers, tank and vessels.
- **Refining & Petrochemical:** Tray-towers, refractory- and glass-lined vessels, tanks, pipe racks, heat exchanger internals, baffle plates

lowering pole

- carbon fiber tubing
- 6' (1.8m) length each
- connect two or more
- threaded stainless ends
- locking safety screw

pole camera adapter

- mounts to camera base with included screws
- threads onto pole
- stainless steel

tank flange mount

- mounts to flanged openings 4-24" (DN150-DN600)
- clamps pole to stabilize camera at any angle
- aluminum construction

lifting hoist ring

- mounts to pole end
- attaches to safety lanyard
- lifts pole and PTZ camera using an overhead crane

PTZx can be used for quick channel-head FOSAR inspection or tube sheet viewing.
